

S3 Day Paddles - Holmes Creek

Live Oak Landing to Cedar Tree Landing Paddle Information Sheet

Description: Be sure to bring a mask and snorkel if paddling scenic Holmes Creek. This remote Panhandle stream is fed by crystalline springs, so the water's clarity is often semi-transparent. Low-hanging branches and twisting bends add some challenge as the waterway makes its way past high sandy banks and lush swamplands. Several old-growth cypress and gum trees can be seen along the shore. Wildflowers in the spring and brilliant fall colors in October and November add to the beauty of this pristine waterway.

Skill Level: Intermediate

Distance/Approximate Time: 12.9 Miles/4.5 Hours

Launch Site: Live Oak Landing Ramp

Takeout Site: Cedar Tree Landing Ramp

Special Considerations: Check with a local outfitter for water levels and navigability. Creek can be busy with tubers and swimmers, especially on weekends and in the summer months. This paddle requires shuttling vehicles.

Skill Level Definitions

Beginner: New to paddling and may need tips and or instructions about paddling strokes, safety procedures, and entering/exiting kayaks. Comfortable on short trips of 1 to 3 miles on protected waters, when wind does not exceed 5 mph.

Novice: Paddlers acquainted with basic paddle strokes and can manage kayak handling independently in winds not exceeding 10 mph on protected waters. Comfortable on trips up to 6 miles.

Intermediate: Paddlers with experience in basic strokes and some experience on different venues, including some open water. Comfortable on trip distances of 6 to 10 miles, winds not exceeding 15 mph.

Advanced: Seasoned paddlers who possess skills and experience to paddle all venues and conditions. Experienced in self-rescues. Should be comfortable paddling more than 10 miles in a day.

NOTE: Great care has been taken to ensure this guides accuracy, but weather, tides, and water conditions can change rapidly and create hazardous conditions. These maps are for visual reference only, please consult NOAA Charts for navigation. Paddlers should have all proper safety equipment and check conditions before departure. All paddlers should always wear PFDs while on the water, and leave a float plan. There are inherent dangers in any paddle sport. There are special hazards along the Florida coast due to shifting tides, changing wind and weather, shallow waters, and treacherous bottoms with soft mud, rocks, and oyster bars. It is up to each paddler to be aware of these dangers, to accept and be prepared for the risks involved, and to be certain they have the skills to safely paddle in these conditions.
