

S8 Day Paddles and Overnight Camping Trips - ICW

BC 21 Primitive Camping Trip Information Sheet

Description: This is a small spoil island along the Intracoastal where camping is allowed. Beach landings are on the west side of the islands near both the south and north ends of the island. Don't be surprised to be wakened by the sounds of lawnmowers or leaf blowers first thing in the morning, residential areas are just across the water. It can also be noisy at night from the bridge traffic if the wind is blowing out of the south.

Skill Level: Intermediate

Distance/Approximate Time: 1.9 Miles/1 Hour

Launch Site: Tom Stuart Causeway Dog Park Paddle Launch

Special Considerations: ICW can get rough when the winds are blowing out of the southeast or northwest. Be aware of boat traffic. Please practice "Leave No Trace" principles.

Skill Level Definitions

Beginner: New to paddling and may need tips and or instructions about paddling strokes, safety procedures, and entering/exiting kayaks. Comfortable on short trips of 1 to 3 miles on protected waters, when wind does not exceed 5 mph.

Novice: Paddlers acquainted with basic paddle strokes and can manage kayak handling independently in winds not exceeding 10 mph on protected waters. Comfortable on trips up to 6 miles.

Intermediate: Paddlers with experience in basic strokes and some experience on different venues, including some open water. Comfortable on trip distances of 6 to 10 miles, winds not exceeding 15 mph.

Advanced: Seasoned paddlers who possess skills and experience to paddle all venues and conditions. Experienced in self-rescues. Should be comfortable paddling more than 10 miles in a day.

NOTE: Great care has been taken to ensure this guides accuracy, but weather, tides, and water conditions can change rapidly and create hazardous conditions. These maps are for visual reference only, please consult NOAA Charts for navigation. Paddlers should have all proper safety equipment and check conditions before departure. All paddlers should always wear PFDs while on the water, and leave a float plan. There are inherent dangers in any paddle sport. There are special hazards along the Florida coast due to shifting tides, changing wind and weather, shallow waters, and treacherous bottoms with soft mud, rocks, and oyster bars. It is up to each paddler to be aware of these dangers, to accept and be prepared for the risks involved, and to be certain they have the skills to safely paddle in these conditions.
