

Day Paddles and Overnight Camping Trips - Black Creek Leg 2

Knights Landing to Indian Ford Paddle Information Sheet

Description: The creek is named for the water coloration, caused by the presence of tannin from decaying leaves and vegetation. It is considered to be one of the cleanest creeks in the state. Like Leg 1, this second short leg is very narrow and twisting as it flows through Jennings Forest.

Skill Level: Novice/Intermediate

Distance/Time: 2.2 Miles/Approximately 1 1/2 Hours

Launch Site: Knights Landing Paddle Launch

Takeout Site: Indian Ford Paddle Launch

Special Considerations: Paddle requires shuttle, possible snags/deadfalls, and current can be strong with recent heavy rains. If this leg is too short for you, consider starting above Knights Landing at the Ellis Ford Paddle Launch, which will increase your paddle length to 5.2 miles.

Skill Level Definitions

Beginner: New to paddling and may need tips and or instructions about paddling strokes, safety procedures, and entering/exiting kayaks. Comfortable on short trips of 1 to 3 miles on protected waters, when wind does not exceed 5 mph.

Novice: Paddlers acquainted with basic paddle strokes and can manage kayak handling independently in winds not exceeding 10 mph on protected waters. Comfortable on trips up to 6 miles.

Intermediate: Paddlers with experience in basic strokes and some experience on different venues, including some open water. Comfortable on trip distances of 6 to 10 miles, winds not exceeding 15 mph.

Advanced: Seasoned paddlers who possess skills and experience to paddle all venues and conditions. Experienced in self-rescues. Should be comfortable paddling more than 10 miles in a day.

NOTE: Great care has been taken to ensure this guides accuracy, but weather, tides, and water conditions can change rapidly and create hazardous conditions. These maps are for visual reference only, please consult NOAA Charts for navigation. Paddlers should have all proper safety equipment and check conditions before departure. All paddlers should always wear PFDs while on the water, and leave a float plan. There are inherent dangers in any paddle sport. There are special hazards along the Florida coast due to shifting tides, changing wind and weather, shallow waters, and treacherous bottoms with soft mud, rocks, and oyster bars. It is up to each paddler to be aware of these dangers, to accept and be prepared for the risks involved, and to be certain they have the skills to safely paddle in these conditions.
