

## S8 Day Paddles - Upper Gulf Coast

## Werner-Boyce Salt Springs State Park Paddle Information Sheet

**Description:** This area is located slightly north of the 'Cotee' River in New Port Richey. The great thing about this area is there are a lot of options. The large area north of the state park is open of exploration for the more experienced paddler. Cow Key, which is about halfway along this paddle, has a nice beach area for taking a break or a swim.

**Skill Level:** Novice/Intermediate

**Distance/Approximate Time:** 4 Miles/2 Hours

**Launch Site:** Werner-Boyce Salt Springs State Park Paddle Launch or Brasher Park Paddle Launch

**Special Considerations:** The area is extremely tidal sensitive. It is recommended that it be paddled on medium to high tides. This is mangrove territory. While the path seems simple on the map, it is easy to get lost in this area. Map and GPS recommended especially if exploring the area north of the Park. Some open water paddling. Fee at State Park.

### Skill Level Definitions

**Beginner:** New to paddling and may need tips and or instructions about paddling strokes, safety procedures, and entering/exiting kayaks. Comfortable on short trips of 1 to 3 miles on protected waters, when wind does not exceed 5 mph.

**Novice:** Paddlers acquainted with basic paddle strokes and can manage kayak handling independently in winds not exceeding 10 mph on protected waters. Comfortable on trips up to 6 miles.

**Intermediate:** Paddlers with experience in basic strokes and some experience on different venues, including some open water. Comfortable on trip distances of 6 to 10 miles, winds not exceeding 15 mph.

**Advanced:** Seasoned paddlers who possess skills and experience to paddle all venues and conditions. Experienced in self-rescues. Should be comfortable paddling more than 10 miles in a day.

**NOTE:** Great care has been taken to ensure this guides accuracy, but weather, tides, and water conditions can change rapidly and create hazardous conditions. These maps are for visual reference only, please consult NOAA Charts for navigation. Paddlers should have all proper safety equipment and check conditions before departure. All paddlers should always wear PFDs while on the water, and leave a float plan. There are inherent dangers in any paddle sport. There are special hazards along the Florida coast due to shifting tides, changing wind and weather, shallow waters, and treacherous bottoms with soft mud, rocks, and oyster bars. It is up to each paddler to be aware of these dangers, to accept and be prepared for the risks involved, and to be certain they have the skills to safely paddle in these conditions.
